

BESKYTTELSESGLASS SG-LS

SG-LS-150

Beskyttelsesglass SG4 150 mm

- Ulike lengder
- Enkel installasjon
- 2-3-4 ståler lysbom

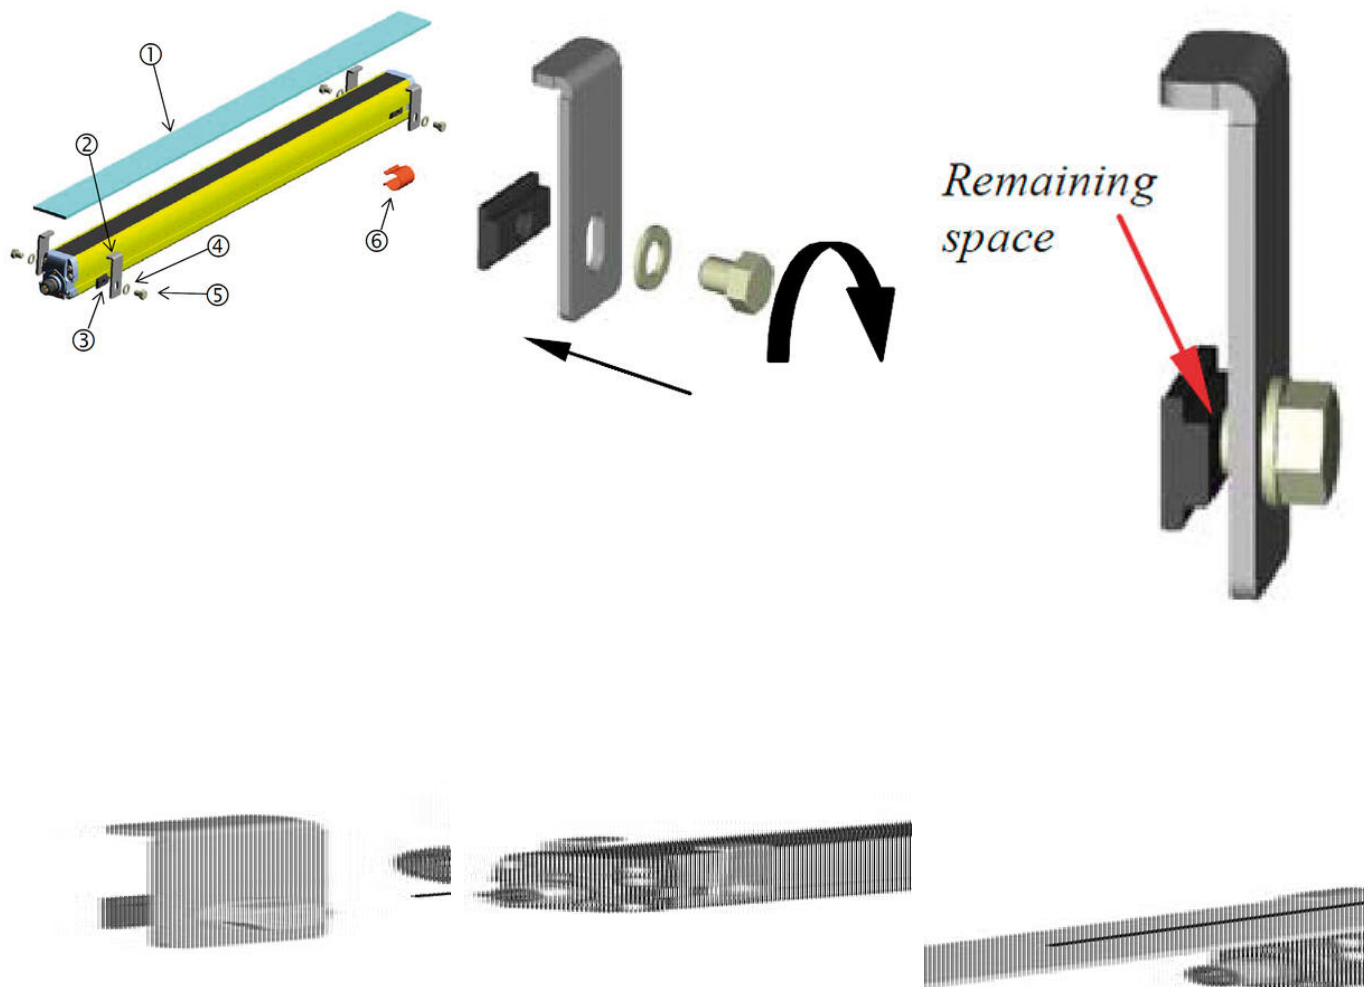

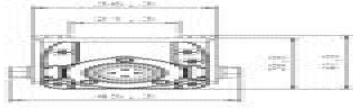

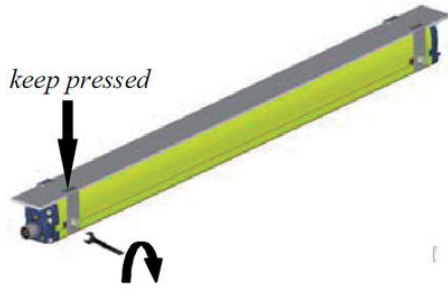

PRODUKTBESKRIVELSE

Beskyttelsesglass SG-LS er en beskyttelse for Datalogic's lysstrålebeskyttelse som beskytter mot støv, spon og dråper fra materialer plassert i nærheten av lysstrålebeskyttelsen.

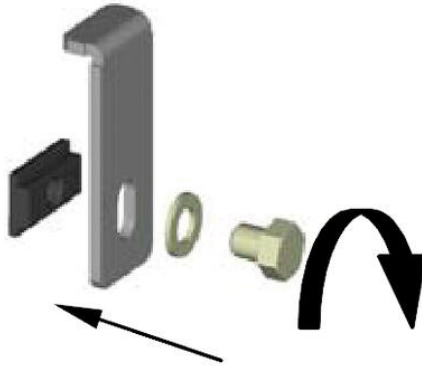

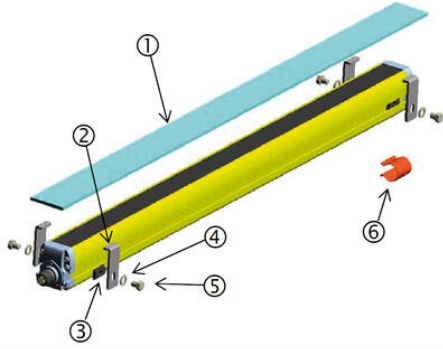

Den unike profilen samt tilgjengeligheten i ulike lengder gjør at den passer alle lysbommer og lysgitter fra Datalogic.

Beskyttelsesglass SG-LS kan enkelt installeres takket være festebrakettene som bruker sporet på siden av lysstrålebeskyttelsen.
