

# PLASTIC ENCLOSURES FOR EM-PRODUCTS

## GENERAL FEATURES

- Material Polycarbonate or ABS
- Protection class IP65
- Mounting plate available
- Indoor or outdoor use

These housings can be used with several EM-products. These housings offer protection class of IP65, and are based on FIBOX MNX series. Material is mostly PC ( polycarbonate ) but ABS is also an option. PC is suitable for indoor and outdoor use, as ABS is recommended only for indoor use. Some cards can be installed directly to housing but some products require a mounting plate for assembly. We have also available some pre drilled mounting plates.

## HOUSINGS

EM-T19 PC 130x80x35mm, outlets 3xPG9

EM-T20 PC 130x130x35mm, outlets 4xPG9

EM-T27 PC 130x130x60mm, outlets 2xPG11 + 4xPG ( mounting plate T33 )

EM-T28 ABS 130x130x60mm outlets 3xPG11

EM-T39 PC 180x130x60mm outlets PG11 + 9xPG9

PG9 for cables with diameter 3 - 7mm  
PG11 for cables with diameter 4 - 9mm

NOTICE! When card is installed in a plastic box, the continuous power rating will decrease. This because the cooling of the card is not as effective as in free air.
